## **Norman sister's Petition Statement:**

We filed a petition in hopes of helping others and to draw attention to the injustices of what happened. For our father there is nothing more that can be done now, but hopefully spurring a thorough investigation by the authorities there will be accountability for the inconsistency's , lack of empathy, and lack of sympathy for families involved in this facilities care.

We have seen through a life time of caring for their father that nobody wants to answer questions or take responsibility for their actions, not only at Pawtuxet Village but elsewhere. This conduct may be the only consistent element of elderly care notable in many facilities.

We must demand better quality care for our elderly, especially at the time of their lives when they need quality care the most.
