RECREATIONAL BIKER'S TERRORIZE CRANSTON STREETS

City of Cranston Mayor Elect Ken Hopkins as well as all City Council Members are forced with decisions concerning "Recreational Bikers" terrorizing the city of Cranston. In the "summer of 2020" the Alliance for Safe Communities approached city councilman Favicchio, regarding a city ordinance being explored addressing the increasing reports of menacing bikers in Cranston. Areas within the city lines of Cranston, residential and business areas citywide, and rural Cranston roads were all experiencing increased incidents and occurrences of "Recreational bikers" wreaking havoc with residents under siege. No results came to fruition. New Year's Day 2021, seems to have been utilized as a clear message from these "grafters" as their mayhem becomes "open season", in the city of Cranston. When officers become mere "physical obstacles" to be driven over during this "anarchy", consequences are most dire and necessary. Message received, the response should be swift and effective by the elected officials holding their newly appointed offices and those incumbents as well.

Executive Director Alliance for Safe Communities , Carolyn Medeiros
